## WAVES

WAVES is Open-source blockchain platform for cutting-edge dApps - giving you the tools to build your own incredible WEB3 solutions. The tools WAVES provide will enable a web that is transparent, yet protects users' privacy, and ensures the integrity of data without the centralisation and single points of failure that are inherent in web 2.0.

WAVES is the next step in the evolution of the internet, which is why we chose this platform.

## FORFUN ECOSYSTEM

Each coin is like a participation in our endeavors. Everyone who has a minimum of 10,000 ForFun coins automatically becomes investor and starts to receive 3% monthly (paid in ForFun coins). Shares are usually paid daily, the maximum period between payments is 7 days. To receive daily payouts you have to keep coins in your WAVES wallet.

When one of our entities needs funds for a project, we will organize the sale of ForFun coins, the profit from this sale will be used to fund a project.

At least once a month, 50% of profits from our projects will be used to gather coins from the market. Carefully look at the ForFun coins chart on WAVES DEX. You can find ForFun/Waves market here:
